Moniey. April 18, 1881

A lot of newspaper men in New York drank laudanum the other day in mistake for brandy. This shows that newspaper men know nothing of laudanum.

The Republicans are to run Foster again for Governor. The Governorship of Ohio is an empty honor, but they made him give up the Senatorship and something must be done for Charley.

Whether through purpose or igorance it is hard to tell, but the beautiful way in which some Republican papers (we say some, because the best ones do not) misinterpret the bearing of Mahone's connection with the Republican party, is entertaining. If they [would only understand that the Democrats do not claim that Mahone was Gives Special Attention bound to vote with the Democrats: what they do say, is that Mahone is a Democrat, was elected through the aid of some Democratic votes, and is the representative of a State that is strongly Democratic. They do not say that he was bound to vote with the Democrats, but do say that he naturally would do so unless he could see some advantage to himthe best of it. Consequently when Mahone votes with the Republicans and the Republicans in turn nominate his friends, Democrats all, for official positions. All we can say is that it looks very much like a bargain and sale with Talestand and the second to car young man who desire to prepare themselves for business pursuits. It has an excellent corps of an arrow Root for chicking and invalides. Sold by all grocers, Samples control its purity, eminent physicians control its purity, eminent physi self for doing otherwise. The only differ-

consideration on both sides. The Repub licans of Virginia have taken the trouble to openly avow that they have no connection with him, and ask the President to sever him. That is the simple plain reason which have impelled the democratic and the best Republicans to impute a bargain, all talk about the hostility arising from Mahone's desire to secure a free ballot is bosh, and show either a weak mind or a distorted imagination in the person making it. Have not the Republican papers of the North done enough lying on that subject, or have they got so in the way of it that no effort of theirs, or any one else, can stop it. We know that sec tionalism is their stock in trade, but they might lay in a new one.

Owing to a popular idea that a remedy said to cure a variety of maledies should be treated with caution, if not suspicion, the inventor heelt-sted some time in placing it before the public; but from the gratifying assurance by a great number of the rare vitalizing and health-renewing proper-ties of his preparation of Hypophosphitz, under a variety of circumstances, he is equally satisfied that these effects are secured by its use, that its that these effects are secored by its use, that its action is peculiar to his preparation, and that Con-sunption is not only Curable, but, up to a certain stage, is stage, is as was ly controlled as most other
